TERM PROJECT RULES

The term project is intended to help students boost their exam grades. Please read the rules carefully.

1) Every group must select one Term Project Topic, and inform the project advisor (not all the TAs) no later than 09.00am April 9, 2014. Please read the attached documents on Blackboard Learn (not attached to this message) for the project options and the project advisors.

2) The source code must be submitted via Blackboard Learn before 09.00am April 23, 2014.

3) Groups are going to present their projects on April 23 and 25, 2014 during class hours.

4) All group members must be present during the demo to get grade for the term project.

5) Groups should prepare a Power Point Presentation on how the software is designed. They will need to also run their program and explain how it works.

6) Each group member, individually, will be asked questions about the project source code. Therefore, please make sure that every group member knows the project source code very well.

7) Grading will be from 1 to 10. Half of the grade will be added to your Exam 1 and Exam 2 grades. For example, if your group gets 10 (and you qualify for the GroupGrade), this will increase both your Exam 1 and Exam 2 by 5 points!

8) Please note that the GroupGrade will be based on weighed sum of the students’, TA’ and the professor’s votes. Each group will have only one vote for other projects.

9) Please note that if a group member does not present during the presentation, his/her term project grade will be 0.

10) Please note that if a group member fails to answer questions properly, she/he may earn partial credit ranging from 0 to GroupGrade.
