Research Methods in computer science
Spring 2020

Lecture 21

Omprakash Gnawali
April 13, 2020
Agenda

Experience writing a paper
Reading Papers
Sampling Bias
Conference Updates
Experiences Writing

• Template was useful even though I had some prior writing experience
• Prior experience was writing a section of a paper; finally got a full paper writing experience, including more references and thinking about all aspects.
• Prior writing experience as the first author; took 1.5 months to write; multiple iterations; did not iterate as much for current submission; process similar to previous writing
• Concepts are clear to me but not necessarily for the audience; a lot of results, hard to prioritize for this audience
From “Where” to Read Papers?

Conferences? Which?
Journals? Which?

From where else?
Paper Notes / Tracking

Things worth remembering
Results, Ideas, Authors, ....

Electronic systems [Mendeley??...] Could be integrated with References
Sampling Bias

“In statistics, sampling bias is a bias in which a sample is collected in such a way that some members of the intended population are less likely to be included than others. It results in a biased sample, a non-random sample of a population (or non-human factors) in which all individuals, or instances, were not equally likely to have been selected. If this is not accounted for, results can be erroneously attributed to the phenomenon under study rather than to the method of sampling.” -- wikipedia
Types of sampling bias
Self selection bias
Pre-screening
Exclusion
etc.

[from wikipedia]
Using signal strength for link quality estimation can introduce sampling bias.
Link quality estimation

Estimate how “good” a link is. Important for link selection.
ETX Estimation Example

Beacons

ETX Estimate (alpha = 0.8)
Link Estimation using PHY info

Unacked

PRR

LQI
Quality of reception = Signal / Noise

Lot of wireless network research tries to understand performance as some function of SNR
“The Prism 2.5 chip-set provides per-frame measurements called RSSI (receive signal strength indication) and “silence value.” The RSSI reflects the total power observed by the radio hardware while receiving the frame, including signal, interference, and background noise. The silence value reflects the total power observed just before the start of the frame. We found that the accuracy of the RSSI and silence readings was within 4 dB by comparison with a spectrum analyzer. This paper reports signal-to-noise ratios derived from the RSSI and silence values.” – [Aguayo et al. 2004]

Quality of reception = Signal / Noise
How to select participants for an HCI study?

What is the possibility of sampling bias?
Example of bias due to a significant change in mixture of data source
Measurement & Data collection

- M-Lab servers run **Web100** instrumentation
- Only users' measurements are collected. No other traffic.
How much data? How many tests?

Jan 25 2010
uTorrent launch
Mar 11 2010
FCC launch

NDT
Tot tests: 22M
Tot size: 93TB

NPAD
Tot tests: 34K
Tot size: 2GB
Dataset Bias in Object Recognition Research

Unbiased Look at Dataset Bias [CVPR 2011]
Object Recognition Research

Dataset is a set of pictures of objects
Run algorithm to recognize/identify objects
Compute accuracy or other metrics

What are potential dataset bias?
Sampling, Capture, Negative Set
How to reduce selection bias in visual object recognition datasets?
Research that uses online/social media data

Research: how people communicate, spread information, discuss, decide, etc.

What are some potential bias in the dataset?
What are the implications?
Datasets and consequences

How Vector Space Mathematics Reveals the Hidden Sexism in Language

Exercise

Think of a ML/big-data idea

Identify a dataset on which you want to do machine learning

Describe a potential bias there in the application
Conference Updates

Paper review submissions coming up
Other logistics
HW 10

Review the papers you were assigned
