Class Introduction

Introduction
Name
Research Topic/Group/Advisor
Year(s) at UH
Undergrad institution/country/city
Topics for today

PhD and Research
PhD template
The concept of deliberate practice
Research Ideas
Computer Science Research

It is a little different from what that wikipedia article says.

We build new artificats

- What are the desirable properties?
- How does it perform?
- How well does it solve the problem?

Closer to engineering than natural sciences.
Practical Process of Getting a CS Ph.D.

Generate papers?
   Need N papers to graduate??

Create new technology that will change the way we do things
   Describe your technology in a paper
   Paper is not the goal. It is a vehicle for communication and dissemination.
Skills

What skills do we need to do research?

How to create knowledge?

(Practical) How to produce output such as: paper/presentations/software?
Frequent Practice

You may write just a few papers during your PhD.
   Not enough practice to be a good writer.

You may do just a few conference/external audience presentations during your PhD.
   Not enough practice to be a good presenter.

You may think you have infinite time to write your paper.
   Not a good environment to learn to be productive.

We will try to address these issues in this course.
PhD Goals

What are they?
Push the field forward.
Practical Goals of CS Ph.D.

Generate papers?
   Need N papers to graduate??

Create new technology that will change the world and describe it in a/few papers.
Research Skills vs Technical Knowledge

Research skills are different from discipline-specific knowledge.

Research skills are somewhat general.
   Could even extend to other sciences.

We can improve proficiency by practice.
   Need iterations and pattern matching.
Research Skills

What skills do we need to do research?

How to create knowledge?

(Practical) How to produce output such as: paper/presentations/software?
Related Skills

• Research Skills
• Soft Skills
• Skills for Entrepreneurs
• Leadership Skills
Systematic Practice

Vs

Try harder
Deliberate Practice

Observe
- Find good papers and presentations
- Study the content and style

Identify Skills
- Compare with your habits/skills/outputs
- Details (not high level like “writing”)

Practice
- Drills to challenge and improve
- Iterate with feedback
PhD Milestones

What are they?
PhD Template

Work on a project or two, often assisting a senior student; write a little

Work on a major project; write one or two papers on that topic

Write a dissertation
Discussion on variations in the “PhD template”

Think about your post-PhD objectives
Recap...

- What do you need to know/learn?
- What do you already know/learn?
- What do you want to work on?

- Practice, observe, adapt, seek feedback, iterate
Finding a Topic

Different from working on a topic

Didn’t get a chance to practice this much until now
An Observation About Ideas...

Rarely do we see an idea with no relation to the existing body of knowledge.
Assignment 1

Please describe two topics of interest in Computer Science, one in your area of research and one related to the metaverse. Each paragraph must have:

Title
Clear and short explanation of the topic, understandable to a broader CS audience.
Reason why the idea is interesting
