

SDP Course Prerequisite Verification

The Software Development Practices course is a hands-on course with intensive programming activities. Students are expected to know good software development practices, principles, and design techniques. This prerequisite is essential to help succeed in the course, not only the student, but the teams that they are part of. If you do not meet the prerequisite, please drop the course and retake it when you do meet the prerequisite.

Students who do not fulfill the prerequisite will be dropped from the course by January 19th. Please turn in this form to the instructors by end of the first class on January 18th.

Your full name: _____

Your Peoplesoft ID: _____

Have you taken COSC 4353/6353 Software Design:

_____ Yes, if so when _____

_____ No, but I've taken an equivalent course (If you have taken an equivalent course elsewhere, please send the course syllabus to the instructors for evaluation. This has to be done on or before January 18th. January 19th is too late for this. You will be dropped from the course if we find that the course does not satisfy the needs for the SDP course prerequisite).

_____ No, I've not taken the prerequisite. Please drop from SDP course. You will be dropped on January 19th if you are still registered.

Thank you for your understanding and helping us maintaining the prerequisite for this course.
